

*EUSAIR revision process:  
Pillar 4 thematic consultation*

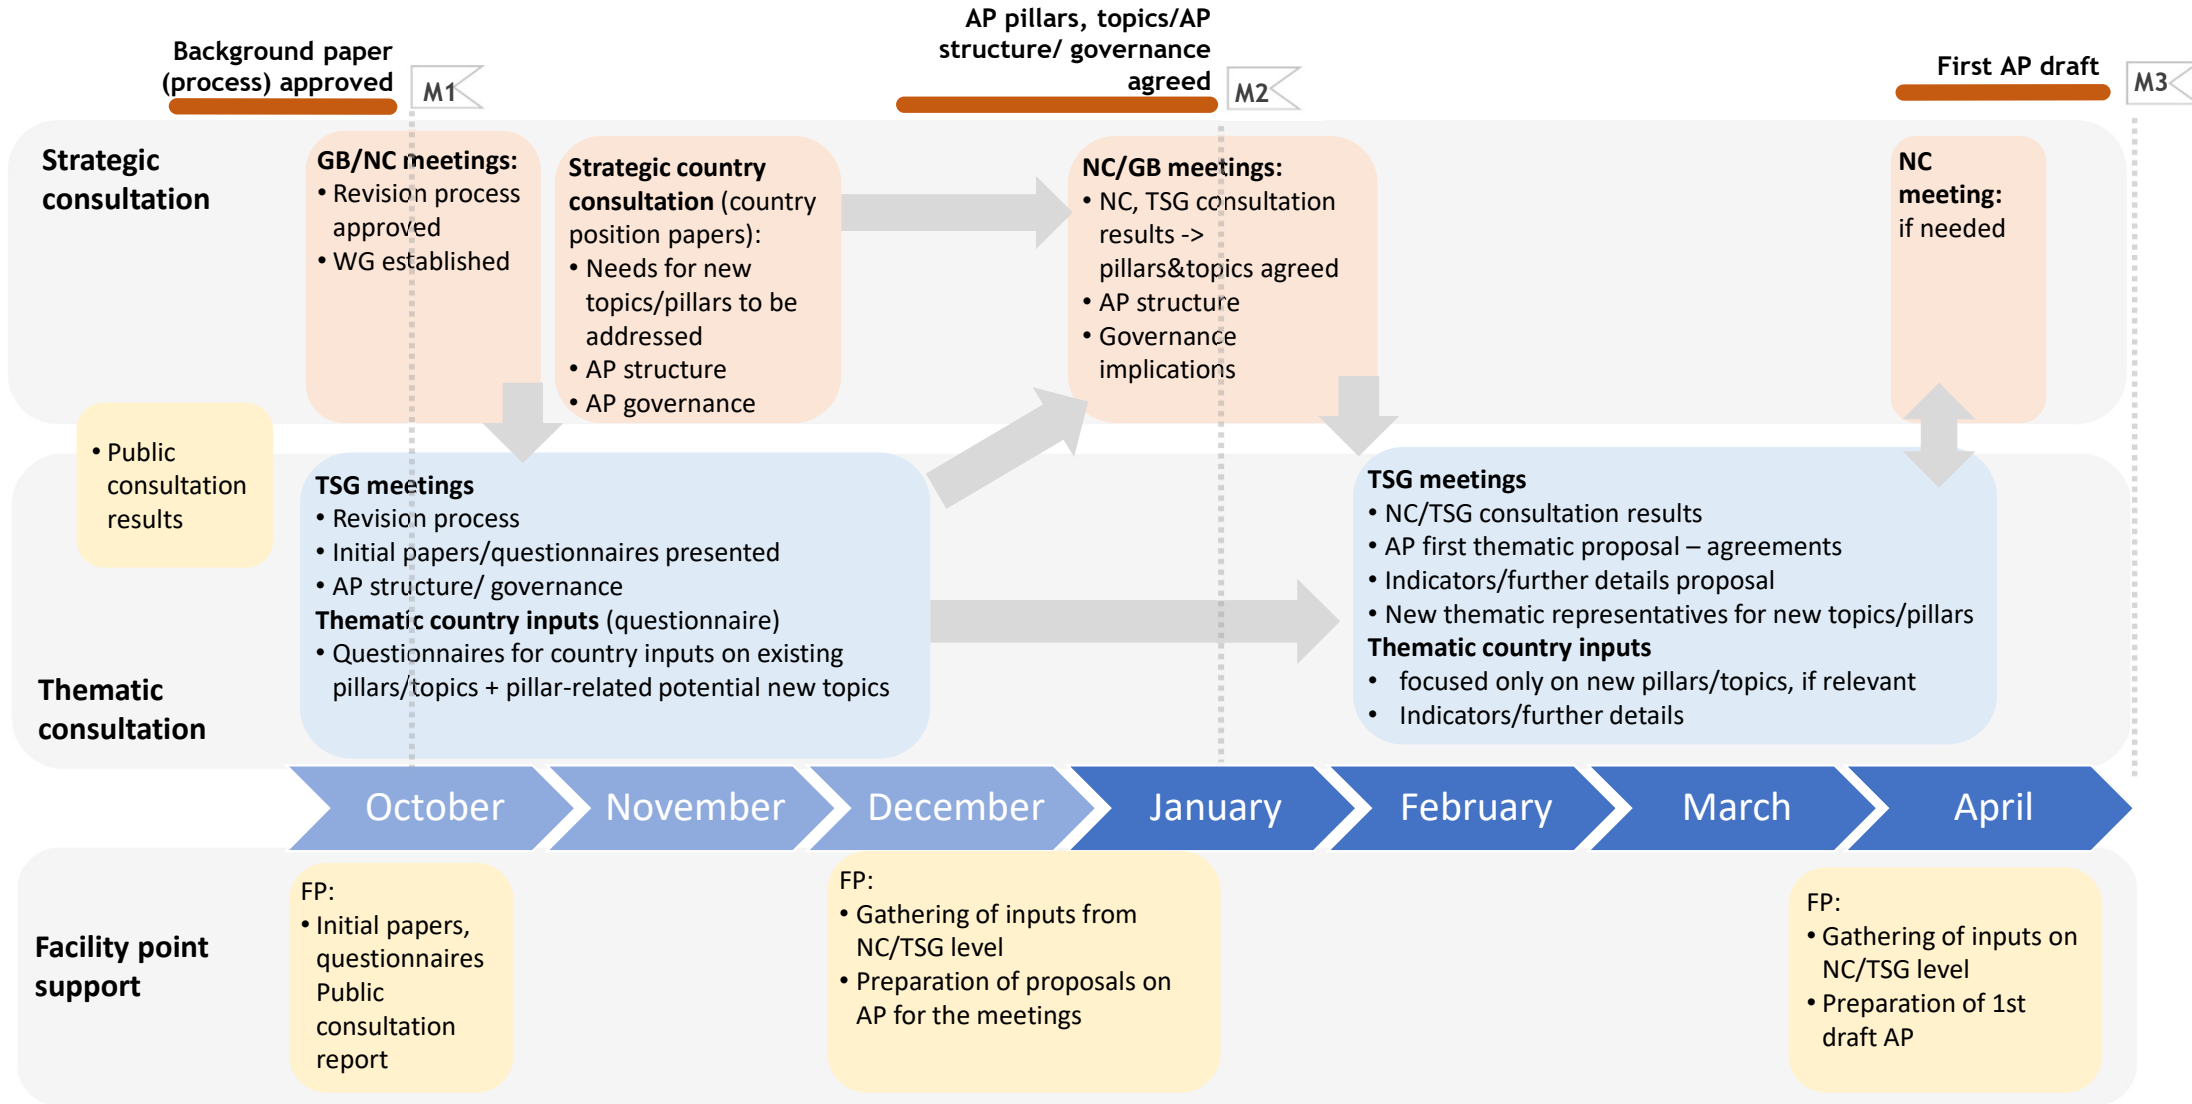

**Meeting**  
**Online, 25th November 2022**

# *EUSAIR revision timeline 2022/2024*

# Detailed EUSAIR Action Plan revision till spring 2023

# ***Thematic consultation questionnaire***

- To be used with the initial policy paper
- To be addressed to tourism governance structures
- TSG members gather all relevant inputs from their country so that only one questionnaire is submitted from one country

# ***Thematic consultation questionnaire - use***

- Suggestion on how to use the questionnaire:
- The questionnaire is not meant to be circulated to the possible participants of the workshop or meeting organised to collect the country inputs.
- We propose to share the Initial policy paper with participants, while the questionnaire is to be used by the organiser to lead the discussion at the workshop/meeting using the prepared questions or their simplification.
- The questionnaire should be completed by the organiser at the end of the workshop/meeting to summarise the information provided and agreed by the participants.
- Any new inputs can be noted down at the very end of the questionnaire.

# ***Thematic consultation questionnaire - Meeting***

You can hold a workshop/ a meeting and go over the questionnaire together with the participants.

If you don't have that much time you focus on:

- **Challenges,**
- **the changes we would like to achieve in the AI region (as far as these challenges are concerned)**
- **and on the activities (how to achieve this)**

The organizer can fill in the other parts of the questionnaire based on the answers received to these three main sections

# Questions on Governance

- Should there be a **definition of a mission for each Pillar**?
- Should **objectives** be set per Topics? Should **targets** to be achieved be set as well?
- Should **indicative/possible Actions** as defined in the current Action Plan be skipped and only agreed Actions shall be included?
- Should the **existing, new flagships and/or project examples** be included in the Actions?
- Should **indicators for each Action** and targets to be achieved be included in the Action Plan?
- Any other relevant comments to the Action Plan structure and governance concerning the work in your Pillar and sub-group?

Thank you for a  
constructive  
meeting!
